Power supply with communication converter Spider W5-B

- Spider W5-B can be used as a power supply/communications converter with standalone access controllers from Rex family or as a communication converter with access controllers (Populus) and time & attendance controllers (Regis)
- Built-in both RS485-TCP/IP or RS485-USB communication converter as standard
- Powerful enough to power one standalone controller and one DC door strike or electromagnetic lock (12V DC, 10W)
- Pluggable connectors
- RJ-45 and USB micro sockets
- Pluggable connectors (RS-485 communication line and power output)

TECHNICAL DATA

- **Dimensions: 120x80x33mm**
- **Operating voltage: 110-230V AC**
- **Output: 12V DC, 0.8A**
- **Primary fuse: F100, 250V 0.25A**
- **Secondary fuse: F101, 16V 1.1A, resetable**
- **Pluggable connectors**
- **RJ-45 connector**
- **USB micro connector**
- **Power consumption: less than 1W + load**
- **Operating temperature: +5 to +40°C**
- **LED status notification**
